Summary

Software Engineer working in cloud operations at SAP Emarsys, focused on keeping services reliable through automation and monitoring. Built CI/CD pipelines, worked with Prometheus, Grafana, Helm, and Terraform, and wrote Python and **Bash** scripts to reduce manual work.

SKILLS

Languages/Software: Python, Bash, SQL

Developer Tools: Azure, Linux, GCP, Git, Docker, Kubernetes, Helm, Terraform, Jenkins, Prometheus, Grafana

Soft Skills: C1-English, Collaboration, Analytical Problem Solving, Agile/Scrum, Kanban

EXPERIENCE

SAP Emarsys Hungary

Sept 2025 – Present

Scripting and Automation Specialist Intern

Budapest, Hungary

- Phase 2: **DevOps - Google Application Platform (GAP) Team**
- Built **Grafana** dashboards using Prometheus data with PromQL-based alerting for proactive resource monitoring.
- Python scripts to detect and remediate **Terraform** state drift, so infrastructure stays consistent with declared config.
- Helm chart deployments on **GKE (Kubernetes)** supporting resource management across GCP environments
- Phase 1: **Automation & Scripting - Cloud Infrastructure Team**
- Automated network audit evidence collection via SSH execution on routers, switches, and firewalls.
- Integrated **RESTful APIs** to fetch data from CMDBs, Panorama, and monitoring tools, **improving audit efficiency**.
- Deployed and managed applications on **Google Cloud Platform (GCP)**, ensuring scalability and reliability.
- Implemented **CI/CD pipelines** and scheduled workflows using **Jenkins** for automation and continuous deployment.

HUN REN Energiatudományi Kutatóközpont

Jun 2024 – Aug 2024

Research Intern

Budapest, Hungary

- Developed a machine learning CNN-based image analysis pipeline on 3,500+ microscopy images.
- Used **OOP concepts in Python** and built a Flask-based inference system for batch automated materials analysis.

PROJECTS

Azure Self-Healing Service Monitor

- Set up **Azure** infra using Terraform and managed application lifecycle with Helm charts for clean rollouts & rollbacks.
- Configured **Prometheus** for metrics collection and built Grafana dashboards to visualize resource, service availability
- Wrote a Python health-check script that automatically restarts failed services without manual intervention.
- Built a Jenkins CI/CD pipeline to automate **end-to-end deployment** to Azure on every code push.

Audit Evidence Automation & Orchestration Tool

- **Improved audit workflows** by building parameterized Python scripts using **Jira** APIs to automate fetching, processing, and exporting evidence across projects with configurable date ranges.
- Developed a declarative Jenkins pipeline with scheduled runs, multi-project support, and **automated escalation** via Jira ticket creation and Slack notification.
- Improved manual audit processes by centralizing outputs in cloud storage with environment-based secure configs.

EDUCATION

University of Debrecen

Aug 2022 - Jun 2026

BSc in Electrical Engineering, Debrecen, Hungary

GPA - 4.9/5.0
